

SUPPORT & SERVICE SOLUTIONS (S3)

SELEX Galileo provides Support and Service Solutions (S3) for a wide range of military and civil applications.

In response to the changing defence environment, SELEX Galileo's S3 are focussing on the Company's international capabilities in delivering innovative commercial arrangements with through-life solutions to the Customer.

SELEX Galileo gains the greatest satisfaction from designing bespoke solutions to existing or newly conceived Customer operations, which improve the overall outcome and reduce operating costs.

The Company has an established reputation for support and engineering excellence grounded in products and systems that have seen demanding service, many for over 40 years.

Our portfolio of partnerships includes UK and Italian MoD, BAE Systems, Panavia, QinetiQ, European Space Agency (ESA), Italian Paramilitary forces, as well as Finmeccanica companies Alenia Aeronautica and AgustaWestland, and many international support and supply agencies.

THE S3 OFFERING INCLUDES:

- A portal to the full capabilities of SELEX Galileo and those of our Finmeccanica family.

- A focus on sustainable operational effect as the key outcome for the Customer.
- Tailor made support solutions, where SELEX Galileo actively encourages partnership agreements and joint ventures, working closely with customers to provide optimum customer focussed solutions.
- A service designed for defined budgetary requirements over timescales ranging from short term to through-life support with Through-Life Capability Management (TLCM).
- Repair services at all customer and industrial support locations, together with the provision of special-to-type spares for all lines of maintenance.
- Logistic services ranging from web based spares and repairs reporting to dealing with military licensing and import/ export customs controls.
- Reduced Customer risk and end-to-end operating costs with improved operating outcomes through the active ownership of our designed solutions.
- The ability to deliver technology and capability insertion including special techniques, technology demonstrators and obsolescence management.

TECHNOLOGIES

SELEX Galileo prides itself on delivering cutting edge technology and responding flexibly to a highly demanding and rapidly changing military need. The Company’s technical expertise is embedded in platforms in the air, on land and at sea with microwave, antennae, electro-optics, laser, graphics, computing, and simulation technologies.

SELEX Galileo’s customers benefit from the extensive knowledge and expertise presented by skilled engineers. This broad access to current and emerging technologies enables us to offer integrated systems, capability insertion and upgrade to a variety of end user customers.

In addition, SELEX Galileo complements in-house engineering excellence by drawing upon close association with academia and research as well as third party design authorities.

OUR HERITAGE

Our operational heritage, combined with our experience, knowledge and know-how have enabled us to package the benefits of supporting sophisticated electronic systems, into a more generic capability. This allows us to take any support scenario, evaluate its operation from initial input to final output (end-to-end), and dramatically improve the overall operation.

- **Individual products & sub-systems**
 Air Intercept Radar, e.g. Blue Fox
 Fire Control Radar, e.g. Blue Vixen for Sea Harrier, Foxhunter for Tornado, and Grifo
 Fighter Radar Subsystem, e.g. JAS 39 for Gripen
 Precision Approach Radar (fixed and mobile)
- **System services and collaborative multi system services**
 HIDAS
 EuroDASS
 Euro Radar
 Sky Guardian
 DIRCM
- **Platform support**
 Italian Eurofighter Avionics support
 UAVs, e.g. Falco and Mirach

• **Portfolio of partnered output based services**

- SeaKing - SKIOS
- Merlin - IMOS
- Tornado ATTAC
- Harrier HPAC

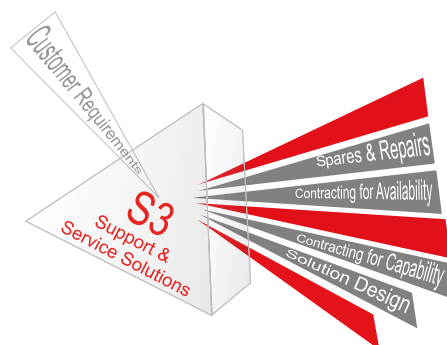

• **Simulation & training**

- Radar Environment Simulator (RES)
- Tornado Full Mission Simulator
- Eurofighter Full Mission System.

CURRENT SOLUTIONS

SELEX Galileo provides services to defence organisations as well as civil authorities and space agencies throughout the world.

The offering includes through-life capability solutions, availability services, partnered solutions, technical support solutions and Maintenance, Repair and Overhaul (MRO), through a spectrum of capabilities:

The competencies of the Group are clearly demonstrated by the prestigious and highly innovative nature of the support and service solutions currently in operation globally.

We pride ourselves in delivering a high quality, reliable service based on trust, co-operation, and a philosophy of openness. These principles have enabled us to build long lasting relationships with customers and will continue to form the ethos of our Support & Service Solutions.
